**EBOFLOOR - SOUND AND HEAT INSULATION FOR VINYL FLOORS**

**SOUND INSULATION**

**GREATER WALKING COMFORT**

**THERMAL INSULATION**

**Description:**

Ebofloor is a resilient underlayment for use beneath vinyl floors. It gives excellent isolation of airborne noise created by impact (Foot-fall) noise, provides a comfortable walking surface, and it also enhances thermal insulation.

Dimensionally stable PVC floor coverings in roll form and carpets are ideal for laying on Ebofloor.

Linoleum may only be laid on Ebofloor, however it cannot be used in conjunction with chair castors, or when there will be heavy permanent concentrated loads.

**Instructions For Use:**

**Ebofloor** can be laid loose or bonded to the floor surface using a dispersion adhesive. Un-bonded assembly with a vinyl floor covering should not exceed a surface area of approximately 750 ft<sup>2</sup>.

**Product Data:**

Base	Polyester Fiber
Coating	High Quality Latex
Sound Insulation	27 dB to DIN 52210
Impact Sound Insulation	56 dB to ISO 717 (BS5821) part 2
Heat Loss Resistance	.060 m/KW
Fire Grade (Swiss)	Combustibility 5 Smoke Developed 3
Toxicity	Non Toxic BAG T No. 614100
Chair Castor loading	Suitable (DIN 68131)
Material Thickness	.16"
Roll Width	6 1/2'
Roll Length	65.5"
